AFMAN 23-110, Volume 2, Part 2, Chapter 26, is supplemented as follows:

SUMMARY OF REVISIONS

This supplement revision updates paragraph references and changes responsibility for maintenance of the Mission Readiness Spares Package (MRSP) and War Reserve Materiel (WRM) from the Storage and Issue Section to the Mobility Section.

26.8.2. Dated items are reviewed by the Mobility Section (88 MSG/LGRSD).

26.9.1. The Mobility Section is designated as the functional check monitor for all WRM assets.

26.9.2. The Airborne Mobile Readiness Spares Package listing (R43/GV876) will be used in lieu of the functional checklist (NGV401).

26.9.3. Items requiring functional check are stored within their respective kits.

26.13. When a WRM kit or package is received on a transfer or loan, a complete inventory will be accomplished within 10 working days.

26.26.2.2. The applicable package listing and logbook will be used for short-term deployments.

26.45.1. Secure storage of mobility bags refers to the space or area in a facility under secure control of the Chief of Supply (COS).

26.45.2. An inventory schedule will be accomplished by the Mobility Section in January of each year for all mobility bags with the exception of bags being provided courtesy storage. Organizations being provided courtesy storage are responsible to contact the Mobility Section to conduct an inventory of their mobility bags.

26.45.2.2. Organizations being provided courtesy storage are responsible to perform all management responsibilities for their mobility bags including securing each individual bag. The COS will allow organizations access to the storage areas as necessary to perform management responsibilities.

26.46.3. Mobility Bags (MOBAGS) are issued as required, in bulk, to support mobility exercises and deployments. AF Form 1297 **Temporary Issue Receipt and Mobility Inventory Control and Accountability System (MICAS)** inventory sheets are filed. The signed AF Form 1297 and/or MICAS inventory sheets are maintained until return of the mobility bag(s).

26.46.3.1. (Added) When MICAS is down and a mobility bag must be issued manually, the following procedures will be used.

26.46.3.2. (Added) To issue the bag, use the MICAS-generated hand receipt located on the cage. Ensure the following information is included on the hand receipt: name, rank, social security number, organization and phone number of the individual being issued the bag.

26.46.3.3. (Added) If there is no MICAS-generated hand receipt on the cage, prepare a **Temporary Issue Receipt**, AF Form 1297. Ensure the following information is included on the hand receipt: name, rank, social security number, organization and phone number of individual and all pertinent data applicable to the bag, to include the bag number and shelf-life information.

26.47.4. The Mobility Section is responsible for management of all Chemical Warfare Defense Equipment (CWDE)/WRM referenced in AFMAN 23-110, Volume 2, Part 2, Chapter 23 and AFMAN 23-110, Volume 7, Part 3.

26.47.8. (Added) The Mobility Section will monitor and forecast shelf-life replacements directly to the Consolidated Mobility Bag Control Center's (CMBCC) storage location with an informational copy to HQ AFMC/LGRP. Any other shortfall requirements (i.e. force structure changes, unserviceable for other than shelf-life) will be provided via quarterly MICAS reports directly to HQ AFMC/LGRP for validation and forwarding to the CMBCC storage location.

JAMES G. CRAMP, Colonel, USAF
Commander, 88th Mission Support Group
